

Technical Training - C# Fundamentals

Introductory support material created from the supplied 13-week training plan. It gives each week a clear session flow, outcomes and lightweight practice.

Week at a glance

Session	Focus	Expected outcome
Session 1	Programming Fundamentals & Syntax	Cover variables, types, operators, expressions and basic C# program structure.
Session 2	Control Structures	Practice conditions, loops and flow control with small programming exercises.
Session 3	Methods & Collections	Use methods, parameters, arrays and common collection types to structure programs.
Session 4	Exception Handling	Understand runtime errors, try/catch/finally and safe error-handling practices.

Session notes

Session 1: Programming Fundamentals & Syntax

Cover variables, types, operators, expressions and basic C# program structure.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 2: Control Structures

Practice conditions, loops and flow control with small programming exercises.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 3: Methods & Collections

Use methods, parameters, arrays and common collection types to structure programs.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 4: Exception Handling

Understand runtime errors, try/catch/finally and safe error-handling practices.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Practice and reflection

These are lightweight practice prompts for the onboarding prototype, not an official assessment.

1. Write five key terms from this week and explain each in one sentence.
2. Draw a simple flow showing how the main concepts connect.
3. List two questions you would ask the trainer before using these concepts in a real project.
4. Identify one practical example from a utility, software system, workplace process or assigned role.
5. Write an end-of-week summary: what you understood, what remains unclear, and what you want to practise next.

Completion checklist

- ☐ I attended/reviewed the planned sessions.
- ☐ I can explain the week's main concepts at a basic level.
- ☐ I completed at least one practice/reflection activity.
- ☐ I recorded questions or gaps for follow-up.
- ☐ I am ready to proceed to the next onboarding chapter.

Note: This is prototype support material. The supplied training plan remains the source for the official week/topic sequence; trainers may provide deeper or updated material.
