

Technical Training - MSSQL & Data

Introductory support material created from the supplied 13-week training plan. It gives each week a clear session flow, outcomes and lightweight practice.

Week at a glance

Session	Focus	Expected outcome
Session 1	Database & Relational Fundamentals	Understand tables, rows, keys, relationships, constraints and relational modeling.
Session 2	Queries & CRUD	Practice SELECT, INSERT, UPDATE and DELETE with filtering, sorting and basic aggregation.
Session 3	Joins	Understand INNER/LEFT joins and combine related information across tables.
Session 4	Practical Data Handling	Work with realistic query scenarios, data quality considerations and safe database operations.

Session notes

Session 1: Database & Relational Fundamentals

Understand tables, rows, keys, relationships, constraints and relational modeling.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 2: Queries & CRUD

Practice SELECT, INSERT, UPDATE and DELETE with filtering, sorting and basic aggregation.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 3: Joins

Understand INNER/LEFT joins and combine related information across tables.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 4: Practical Data Handling

Work with realistic query scenarios, data quality considerations and safe database operations.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Practice and reflection

These are lightweight practice prompts for the onboarding prototype, not an official assessment.

1. Write five key terms from this week and explain each in one sentence.
2. Draw a simple flow showing how the main concepts connect.
3. List two questions you would ask the trainer before using these concepts in a real project.
4. Identify one practical example from a utility, software system, workplace process or assigned role.
5. Write an end-of-week summary: what you understood, what remains unclear, and what you want to practise next.

Completion checklist

- ☐ I attended/reviewed the planned sessions.
- ☐ I can explain the week's main concepts at a basic level.
- ☐ I completed at least one practice/reflection activity.
- ☐ I recorded questions or gaps for follow-up.
- ☐ I am ready to proceed to the next onboarding chapter.

Note: This is prototype support material. The supplied training plan remains the source for the official week/topic sequence; trainers may provide deeper or updated material.
