

Technical Training - MQTT Messaging

Introductory support material created from the supplied 13-week training plan. It gives each week a clear session flow, outcomes and lightweight practice.

Week at a glance

Session	Focus	Expected outcome
Session 1	Messaging Concepts	Understand why distributed systems use messaging and where MQTT fits.
Session 2	Publish/Subscribe Architecture	Learn brokers, publishers, subscribers, topics and topic-based message routing.
Session 3	Communication Flow	Trace a message from producer to broker to consumer and discuss delivery behavior.
Session 4	Integration Concepts	Connect MQTT concepts to devices, services and event-driven application integration.

Session notes

Session 1: Messaging Concepts

Understand why distributed systems use messaging and where MQTT fits.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 2: Publish/Subscribe Architecture

Learn brokers, publishers, subscribers, topics and topic-based message routing.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 3: Communication Flow

Trace a message from producer to broker to consumer and discuss delivery behavior.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 4: Integration Concepts

Connect MQTT concepts to devices, services and event-driven application integration.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Practice and reflection

These are lightweight practice prompts for the onboarding prototype, not an official assessment.

1. Write five key terms from this week and explain each in one sentence.
2. Draw a simple flow showing how the main concepts connect.
3. List two questions you would ask the trainer before using these concepts in a real project.
4. Identify one practical example from a utility, software system, workplace process or assigned role.
5. Write an end-of-week summary: what you understood, what remains unclear, and what you want to practise next.

Completion checklist

- ☐ I attended/reviewed the planned sessions.
- ☐ I can explain the week's main concepts at a basic level.
- ☐ I completed at least one practice/reflection activity.
- ☐ I recorded questions or gaps for follow-up.
- ☐ I am ready to proceed to the next onboarding chapter.

Note: This is prototype support material. The supplied training plan remains the source for the official week/topic sequence; trainers may provide deeper or updated material.
