

Technical Training - ReactJS & Blazor

Introductory support material created from the supplied 13-week training plan. It gives each week a clear session flow, outcomes and lightweight practice.

Week at a glance

Session	Focus	Expected outcome
Session 1	Component-Based Development	Understand reusable UI components, composition and state-driven interfaces.
Session 2	ReactJS Fundamentals	Introduce components, props, state, events and rendering in React.
Session 3	Blazor Fundamentals	Introduce Blazor components and the .NET-based approach to interactive web UI.
Session 4	UI & Application Interaction	Understand forms, events, API interaction and how frontend components communicate with applications.

Session notes

Session 1: Component-Based Development

Understand reusable UI components, composition and state-driven interfaces.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 2: ReactJS Fundamentals

Introduce components, props, state, events and rendering in React.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 3: Blazor Fundamentals

Introduce Blazor components and the .NET-based approach to interactive web UI.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Session 4: UI & Application Interaction

Understand forms, events, API interaction and how frontend components communicate with applications.

Quick check: Explain the idea in your own words and identify one practical place where it could be used.

Practice and reflection

These are lightweight practice prompts for the onboarding prototype, not an official assessment.

1. Write five key terms from this week and explain each in one sentence.
2. Draw a simple flow showing how the main concepts connect.
3. List two questions you would ask the trainer before using these concepts in a real project.
4. Identify one practical example from a utility, software system, workplace process or assigned role.
5. Write an end-of-week summary: what you understood, what remains unclear, and what you want to practise next.

Completion checklist

- ☐ I attended/reviewed the planned sessions.
- ☐ I can explain the week's main concepts at a basic level.
- ☐ I completed at least one practice/reflection activity.
- ☐ I recorded questions or gaps for follow-up.
- ☐ I am ready to proceed to the next onboarding chapter.

Note: This is prototype support material. The supplied training plan remains the source for the official week/topic sequence; trainers may provide deeper or updated material.
